

THE ORIGIN OF BODY RADIOSURGERY WESTERN HEMISPHERE

Dr. Lederman

The origin of Body Radiosurgery in Americas is Dr. Lederman - 1st physician introducing & performing Body Radiosurgery in the Western Hemisphere.

Radiosurgery is very focused, high dose, invisible radiation beams attacking cancer most anywhere in the body. Prior to Radiosurgery, radiation involved treating large healthy areas to hit a much smaller cancer.

Professors would give "postage stamp radiation field" that, in volume, might measure 10x10x20cm (2000cc). To deliver radiation to 2000cc of healthy body, to treat a 10cc tumor - means 200 times more healthy tissue is targeted unnecessarily! Dr Lederman avoids radiating healthy tissues. Isn't that what you prefer?

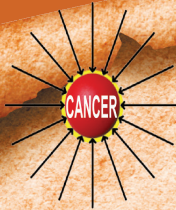

Unfocused, low dose treatments have low success rates and greater toxicity. Treating cancer more successfully, minimizing radiation to healthy tissue is critical for Dr. Lederman! His goals are to enhance people's lives with cancer - and their loved ones!

Unnecessary radiation to healthy tissues commonly serves no useful purpose and may be very harmful. Standard radiation is commonly divided into many sessions, each low dose - suboptimal for many cancers.

Dr L's Radiosurgery created new treatment options never imagined before! Learn from the pioneer, Dr L!

Dr. Lederman

DR LEDERMAN 1ST WITH BRAIN RADIOSURGERY NYC !!

Yellow is healthy tissue radiated with standard radiation. Dr L's Radiosurgery avoids that.

Dr L's Radiosurgery's invisible beams attack cancer - more effectively - minimizing healthy tissue effects.

Many factors stimulated Dr L's Radiosurgery creativity. Decades ago, Dr L commenced research to evaluate people radiated for cancer. One group received radiation to pelvic / abdominal lymph nodes; the second group was treated to pelvic/abdominal and chest nodes.

Dr Lederman's research was groundbreaking & earth shattering.

Dr L revealed serious heart toxicity after standard cardiac radiation. Toxicity was absent in those not receiving cardiac radiation! This landmark observation was first discovered & reported by Dr Lederman!

University professors were shocked but had no answer for what they had done for decades, unquestioning. There was only one answer - cardiac radiation was causing terrible heart complications.

Many academics were defensive as they had practiced, for decades, without recognizing Dr L's critical observation. People receiving cardiac radiation included women with breast cancer, men & women with lung cancer & other malignancies. Spinal radiation was often delivered through the heart. Dr L sought solutions.

People exposed to unnecessary cardiac radiation may have numbered tens-of-thousands per year just in USA, let alone worldwide. This important research by Dr Lederman saves many, many lives!

Dr L's Body Radiosurgery - 1st in Western Hemisphere, treats cancers minimizing cardiac radiation - not possible with standard technology! Dr L's findings about cardiac toxicity, led him to be 1st with very focused, very precise Radiosurgery. Dr Lederman's original medical research, observations & publications touches many lives worldwide in many ways!

PATIENTS WORLDWIDE SEEK DR LEDERMAN'S EXPERTISE

Dr L's most active Brain Radiosurgery program in America, led patients to demand Body Radiosurgery! There was none....until Dr Lederman! Dr L 1st commenced Body Radiosurgery in Western Hemisphere. Dr L's results with brain & body cancers were never seen before. Dr Lederman has treated more than 40,000 patients....and counting!

Dr L has a huge, long & enviable experience with Brain & Body Radiosurgery. Dr L's Body Radiosurgery brought highly-focused, non-invasive, commonly successful therapy for newly diagnosed & recurrent cancers when chemo, immuno, surgery or radiation failed, wasn't tolerated or just wasn't desired.

**DR. L, MARK GREEN & MARY FURMAN.
FIRST BRAIN RADIOSURGERY IN NY**

Dr L's Radiosurgery is disruptive, upsetting the apple cart of existing cancer programs, doctors & hospitals! Who cares? Dr Lederman fights for his patients!

Dr L presents his unique medical experience at national & international meetings to colleagues worldwide. Dr L is vocal to educate all about innovative cancer treatment options and to inform physicians about new cancer treatment technology.

Radiosurgery is most frequently a comfortable, out-patient, non-invasive treatment - avoiding surgery, chemo, immunotherapy, anesthesia, cutting, bleeding & hospitals....performed in minutes. Response is assessed radiographically. Our patient's success is 90% where we attack the cancer. This includes even those with very large tumors, so-called "radio-resistant" cancers & sarcomas - and those with prior treatment.

**FOR YOUR CANCER QUESTIONS, IT'S ALWAYS BEST TO MEET DR LEDERMAN IN PERSON.
WE ACCEPT MOST INSURANCES MEDICARE / MEDICAID. WE'RE SUPER-CONVENIENTLY
LOCATED IN THE HEART OF NYC CLOSE TO MOST SUBWAYS, TRAINS & BUSES.**

DR LEDERMAN 1ST WITH BODY RADIOSURGERY IN THE WESTERN HEMISPHERE!!

Radiosurgery may be the difference between life and death. Dr L's original observations and research is confirmed daily. Dr L's knowledge of standard radiation toxicity enhanced his desire to deliver more effective and safer results via Stereotactic Radiosurgery!

Dr. L's expertise in Body Radiosurgery leads to many great benefits. Routinely utilizing the Stereotactic Body Frame provides precise treatment. Comparing our data to others is most impressive. We have cancer treatment literature about: Brain Tumors, Head & Neck, Skin, Breast, Body including: Lung, Liver, Pancreas, GI, Colorectal, Gynecologic, Bladder, Prostate, Primary & Metastatic & More! Meeting is best!

We aren't afraid to speak about all cancer treatment options.

Why are so many others unwilling to discuss Radiosurgery?

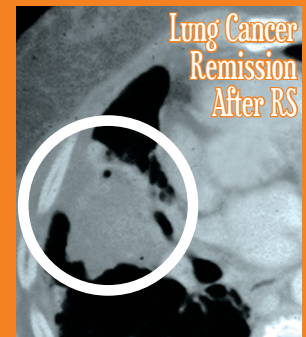

We feel obliged to offer every patient all possibilities.

Working everyday to maintain your good health & trust.

1ST BODY RADIOSURGERY WESTERN HEMISPHERE

Woman's lung cancer grew despite chemo, RT & surgery elsewhere. At age 44, with 2 kids, was sent home to die. Hopeless until Dr L's Radiosurgery created a durable remission from which she benefited for years!

Dr L evaluates each seeking Radiosurgery. Dr L aims to educate all about treatment possibilities. We are not shy to discuss all options - surgery, radiation, chemo, immuno,

combo treatments, no treatment, and of course, Body Radiosurgery.

WE WENT TO MEDICAL SCHOOL TO HELP PEOPLE!

Most insurances Medicare / Medicaid accepted. For information / appointments call 212-CHOICES. Email: LEDERMAN@RSNY.ORG

YOU AND YOUR LOVED ONES MAY BENEFIT FROM DR LEDERMAN'S UNIQUE MEDICAL EXPERTISE!
